

Town Center Area Community Improvement District Project Updates

Chastain Interchange at I-75 Improvements Project – Phase 1

Project Description:

The proposed project will consist of the addition of a new connector roadway over I-75 between Frey Road and Busbee Drive just north of the Chastain Road Interchange. New signals are planned at each end of the proposed connector roadway, one at the intersection with Frey Road and another at the intersection with Busbee Drive. In addition to these improvements, an independent On-Ramp to I-75 North at Chastain Road is being proposed directly from Busbee Drive as well as an independent Off-Ramp from I-75 South at Chastain Road directly onto Frey Road without conflict from traffic on Chastain Road. Both Busbee Drive and Frey Road will be widened to accommodate the additional lanes from the On/Off Ramps and additional turn lanes for the new connector roadway. The implementation of this project should significantly reduce traffic on Chastain Road at the I-75 Interchange.

Project Status:

Preliminary Engineering

Task Amount/Funding Source

Study - \$160,000

Preliminary Engineering – Task 1,2 & 3 \$387,500

Right-of-Way – TBD

Construction – TBD

Project Team:

Consultant: Croy Engineering, LLC

Contractor: N/A
