

Landscape Enhancements and Beautification in and by the TCACID

There are a number of projects that have been completed, are in progress, or about to begin which will enhance and beautify the appearance of the TCACID area.

The beautification efforts are evident as the crews continue work along Chastain Road, Barrett Parkway, and at some of the Interstate entrances where you see "green" enhancements completed or underway.

If you have driven past the previously white stucco wall at the intersection of Barrett and Busbee, you cannot help but notice the granite rock covering that the TCACID has added.

See more photos of TCACID [Progress](#).

If you would like a presentation of these and other [projects](#), please contact [Alison Paul](#), Outreach Manager, or info@TCACID.com. We can arrange to bring the message to your company, or include you in a presentation at the CID office in TownPark.
