

## Finding your way around the Town Center area

You may find it a little easier to navigate around town, thanks to the [Town Center Area Community Improvement District](#). The TCACID began a mission several years ago to install Wayfinding signs to assist vehicles and pedestrians in finding their way into and around the area.

When driving or walking in our community, look for TCACID's signature purple and green signs directing you to your favorite destinations. Directional arrows point to the major points of interest.

Additionally, temporary signs are being installed to explain that [beautification](#) projects are being brought by the TCACID. Remember when you see these signs that your TCACID is working to provide accessibility and mobility throughout the area. While

improvements are in progress, the messes and inconvenience of construction may frustrate commuters, but with the pain, true benefits are taking shape.

**If you would like a presentation of these and [other projects](#), please contact [Alison Paul](#), Outreach Manager, or [info@TCACID.com](mailto:info@TCACID.com). We can arrange to bring the message to your company, or include you in a presentation at the CID office in TownPark.**
